Ballston Lake, NY August 5, 2016: Announce a new head lice prevention and education program called, "The Facts of Lice". The Facts of Lice will take the mystery and hysteria out of the topic of head lice. The programs goal is education and most importantly, prevention of a head lice occurrence. Educational, interactive, and fun, presentations to parents, teachers and students will take the shame out of lice while saving everyone time and money on ineffective products or home remedies.

Elementary School presentations help students to become more understanding because anyone can get lice. Each student receives a New Educational, "Facts of Lice Coloring Book", developed by Miracles On Lice.

Accompanied by a custom made, realistic Lice Exhibit, this three-dimensional diorama depicting the life cycle of lice, will produce a memorable experience. Created by a special effects artist, this exhibit includes two-foot hair strands, one-foot head lice and hatching nits!

Why did Miracles On Lice create this program? Thousands of happy customers repeatedly told us how much they learned from our service and how they taught others. We decided to take our prevention expertise out of our Treatment Center and go directly to the public reflecting our mission to eliminate head lice.

With the school year fast approaching and among the excitement of a new year is the dreaded lurking specter of head lice. NBC Today Show recently aired a story on "super lice", from the Journal of Entomology. Miracles On Lice™ even collected samples for this study by the University of Massachusetts a few years ago.

The Facts of Lice presentation has already drawn interest from New York State Elementary Schools interested in lice prevention education. Our program will put a fun spin on a scary topic, reinforced with The Facts of Lice Coloring Book, will provide interesting facts that students will share with their parents.

Miracles On Lice™ the premier professional lice removal company in the Capital Region and have successfully treated families in located in Ballston Lake, N.Y.
